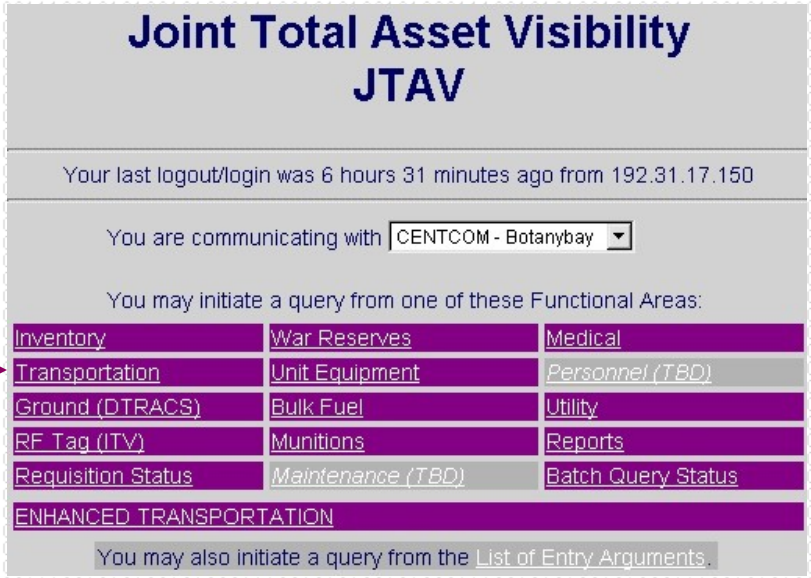
JTAV Tool Tips

JTAV4U!: Interested in viewing shipments inbound to a MILAIR port in the AOR? Here is how to do it in a few painless steps.

Step 1 is to log into JTAV. It's tough to do anything without doing that first!

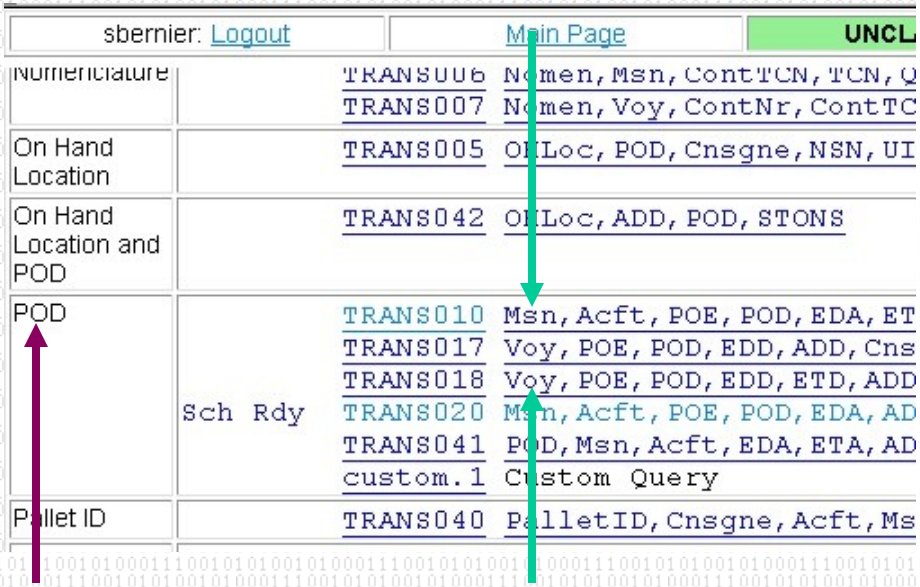
Step 2

- Click on the Transportation link in the functional area.



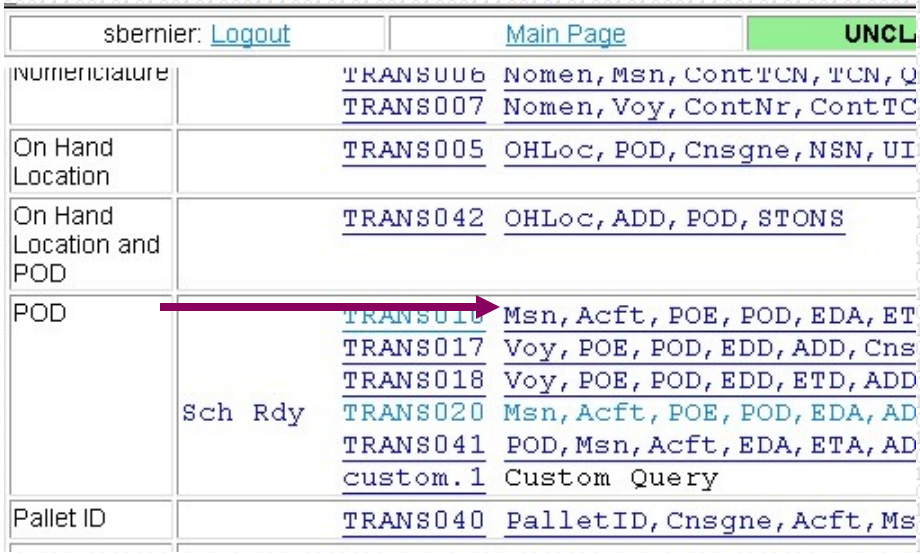
Step 3

- Scroll down until you see POD in the left hand column. MILAIR ports will have Mission Number (Msn) and MILSEA ports will have Voyage Number (Voy).



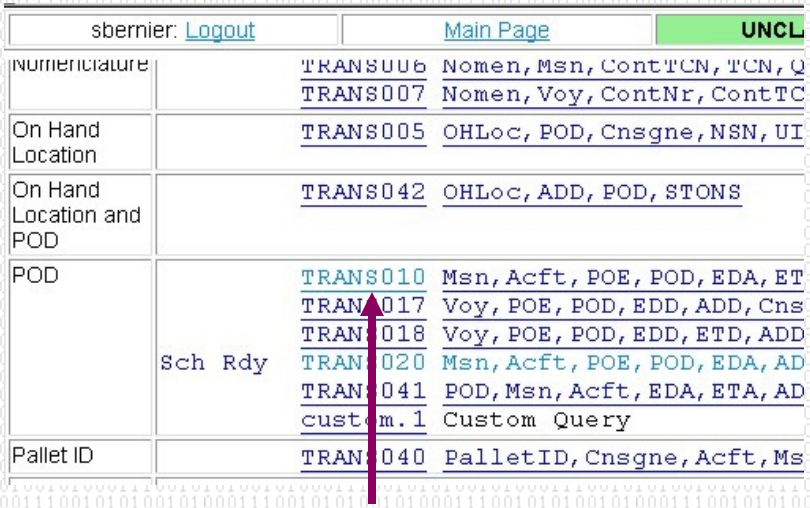
Note

- To view a description of a query, click on the link next to the numbered link.



Step 4

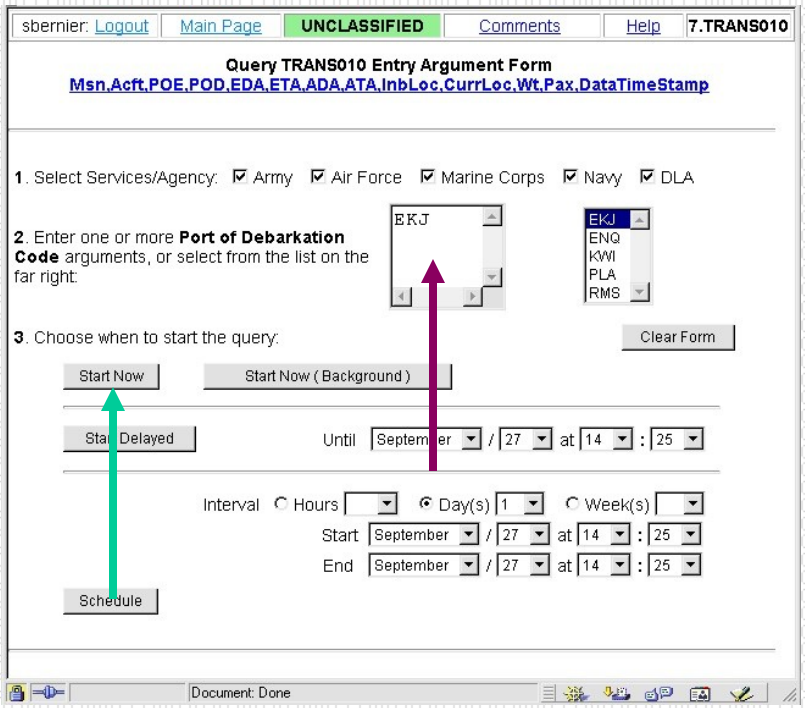
- For MILAIR ports, click on the TRANS010 link.



Step 5

- Enter the port code in the argument box and click Start Now

That's it! You will be presented with a list of air shipments due into an air POD.



Voila!
